

AGBACHUKWU CHISOM EMMANUEL

Frontend Developer | React Ecosystem | Performance-Focused UI

Lagos, Nigeria | [Phone](#) | [Email](#) | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Developer specializing in modern web applications using React and Next.js, with a strong focus on performance, scalability, and user experience. Experienced in building production-ready interfaces with TypeScript and Tailwind CSS.

Proven ability to develop real-world applications including e-commerce platforms, dashboards, and authentication systems, with measurable improvements in performance, responsiveness, and overall user experience.

Familiar with full-stack development using Prisma and PostgreSQL. Passionate about building fast, reliable web applications that deliver real value to users and businesses.

CORE SKILLS

- **Languages:** HTML5, CSS3, JavaScript, TypeScript, Sass / SCSS
- **Frameworks and Libraries:** React, Next.js, Tailwind CSS, Bootstrap, Zustand
- **Tools:** Git, GitHub, VS Code, up, Vite, Figma, Chrome DevTools, Postman, ESLint, Prettier
- **Soft Skills:** Time Management, Problem-Solving, Good Teamwork and Collaboration, Good Communication, Attention to Detail, Adaptability

PROFESSIONAL EXPERIENCE

Frontend Developer (Contract)

InfiniMail — Email Automation Platform

April 2025 - Oct 2025

- Built and maintained a responsive frontend for an email automation platform using Next.js and TypeScript, translating product requirements and design mockups into production-ready interfaces.
- Collaborated with a backend/AI engineer to integrate REST APIs for authentication, campaign workflows, email generation, and real-time data updates.

- Implemented client-side authentication flows, protected routes, and session handling using JWT-based systems.
- Developed reusable UI components and optimized dashboard experiences, improving usability across features such as campaign management and email tracking.

Frontend Developer (Contract)

Youverify Inc, Lagos, Nigeria

Feb 2024 - Aug 2024

- Contributed to the development of user-facing features for KYC workflows, including form handling, data input interfaces. and basic validation processes.
- Built and maintained frontend components for a traffic management system, supporting features such as authentication flows, search functionality, and data display.
- Collaborated with team members to integrate APIs, fix bugs, and improve overall user experience across the application.

Frontend Developer (Intern)

Camelcase Technologies, Lagos, Nigeria

June 2023 -Nov 2023

- Contributed to the development of SafePazz, a visitor and occupancy management platform, by building and maintaining user facing features.
- Implemented core functionalities including authentication, visitor and entity management, and user profile systems
- Developed responsive, user-friendly interfaces and improved application performance through code refactoring and optimization.
- Collaborated with team members to test, debug, and deploy updates, supporting production releases.

SELECTED PROJECTS

AuraByGivx - Luxury Perfume E-commerce Platform

November 2026 – Present

(Next.js 15, TypeScript, Tailwind CSS, Prisma, PostgreSQL, NextAuth, REST APIs)

- A full-stack luxury e-commerce platform for sales of Authentic Unboxed Niche and Designer Perfumes using Next.js and TypeScript, implementing scalable architecture with server and client components, along with SEO-friendly routing and dynamic metadata.

- Designed and developed core features including dynamic product architecture (variants, pricing, discounts), authentication, user dashboards, and checkout flows using NextAuth.
- Engineered backend-integrated functionality using Prisma and PostgreSQL, including secure order processing, cart validation, reviews, and an offline payment workflow with order tracking and admin notifications.

Style Pulse — Fashion Brand (Personal Project)

December 2025

(Next.js, TypeScript, Tailwind CSS, Prisma, PostgreSQL, REST APIs)

- A modern, responsive **Fashion e-commerce** web application using Next.js and TypeScript, focused on performance, scalability, and clean, maintainable UI architecture.
- Designed and implemented core features including product listings, product detail pages, cart and checkout flows, while developing reusable UI components (cards, modals, forms, navigation) using Tailwind CSS.
- Integrated APIs and backend logic using Prisma and PostgreSQL, improving data handling, managing application state, and optimizing user experience through responsive design, smooth navigation, and proper loading/error handling.

InfiniMail - Email Automation Platform (Client Project: proprietary code)

October 2025

Frontend Developer (Collaboration with AI Engineer)

(Next.js, TypeScript, Tailwind CSS, REST APIs, JWT Authentication, Docker)

- Built and maintained a scalable, responsive frontend using Next.js and TypeScript, translating product requirements and Figma designs into production-ready user interfaces.
- Collaborated with an AI/backend engineer to integrate REST APIs (FastAPI) for authentication, campaign workflows, email generation, and real-time data updates.
- Implemented secure client-side authentication, session handling, and protected routes using JWT, while managing API state, loading/error states, and handling asynchronous operations such as email generation, scheduling, and payments.
- Developed reusable UI components (dashboards, tables, modals, forms, pricing cards) and optimized dashboard experiences for campaign management, email history, subscription tracking, and admin tools.

Simplified Chinese - Learning Platform

May 2025 — Present

(Next.js, TypeScript, Tailwind CSS, ShadCN UI, Prisma, PostgreSQL)

- A Chinese learning platform where students meet with teachers to learn Mandarin Chinese. Built with Next.js and TypeScript, includes landing page, authentication flow, and student dashboard for managing learning across different levels.

- Designed and developed scalable UI architecture for students, courses, tests, and progress tracking, with reusable components using Tailwind CSS and ShadCN UI.
- Implemented authentication, protected routes, and session handling, while integrating backend logic using Prisma and PostgreSQL for dynamic data handling and overall application functionality.

EDUCATION AND CERTIFICATIONS

Nnamdi Azikiwe University

BEng Agricultural and Bio-Resources Engineering

Anambra, Nigeria

August 2015 – April 2020
